KEY
TAKE-AWAY

By using MyMathLab to track data as per the college's Quality Enhancement Plan mandate, FDTC statistically proves that the program positively impacts students in the areas of exam scores, retention, and subsequent success.

## Textbooks in Use

Developmental Mathematics, 7e, 2008, Bittinger, Beecher; Intermediate Algebra: Graphs and Models, 3e, 2008, Bittinger, Ellenbogen, Johnson

## Course Implementation

## Course Design

Students attend three hours per week in the Hub (math lab), attend two hours of lecture per week, and use MyMathLab to watch videos, work problems, and take tests.

## Assessments

20 percent
MyMathLab homework 100 percent mastery required to advance.
60 percent

MyMathLab unit tests (proctored) A score of at least 80 percent is required to progress to the next chapter. Students
who do not pass must complete exercises selected by the MyMathLab Study Plan before they are allowed to retake the test. 20 percent MyMathLab final exam (cumulative)

## Use of MyMathLab

MyMathLab is used for all assessments: homework, quizzes, tests, and the final exam. In addition, the program is used for Study Plans, prerequisites, and announcements.

Use of MyMathLab contributes 100 percent to a student's final course grade.

## Results and Data

MyMathLab is a required component in every Hub math course. Courses defined as Traditional in the tables that follow are courses in which use of MyMathLab is optional. The college has established the following four goals against which all progress is measured.

Primary Goal: Increase students' course competencies by at least 5 percent in remedial/prerequisite courses.

Secondary Goal I: Increase course completion rates in remedial/prerequisite math courses by at least 5 percent.

Secondary Goal 2: Increase course completion rates of students in curriculum math courses, who took prerequisite math course, by at least 5 percent.
Secondary Goal 3: Increase final exam average in each remedial/prerequisite math course by at least 5 percent.

## The Student Experience

The school's students appreciate MyMathLab and recognize its contribution to their overall learning. In a recent survey, 82 percent of students ranked the value of the help they reveived from MyMathLab as high or very high. Additional survey comments included the following:

- "I've been out of school for more than 20 years. MyMathLab helped me to recover most of the knowledge I had lost."
- "When I caught on more quickly than others, I didn't have to wait to advance in the course."

## Conclusions

Data from primary goal competency studies and secondary goal I completion studies indicate that students both learn more and persevere longer when MyMathLab is required than when it is optional. What's more, data from secondary goal 3 show that the final exam scores in Arithmatic,

Prealgebra, and Beginning Algebra are higher for those students whose courses required the use of MyMathLab.
