

## STUDENTS SPEAK: A Mastering Success Story

### MasteringChemistry®

#### Adana Nethery

Barton Community College, Great Bend, KS

**Ambition/Career Goal:** Dietetics

**In my free time...** I volunteer with the Juvenile Diabetes Research Foundation and the Purchase Area Diabetes Coalition. I run, play disc golf, and ride my motorcycle.

**What (or who) motivates and inspires you to graduate from college?**  
Myself

#### How did using MasteringChemistry help you succeed in your course?

Mastering helped me succeed by being easy to use and convenient. I could access my book and homework no matter where I was. I loved having the eText and being able to access other resources to help me when I was having trouble solving problems. My favorite features are the eText and hints. With the eText, I don't have to lug a heavy book around with me. I also love the hints on problems. I'm taking an online class, so it's not always convenient to wait for the professor's reply when I need help. Hints help walk me through the problem and figure it out.

#### What is the number one benefit of using MasteringChemistry?

The number one benefit is learning chemistry and having access to MasteringChemistry no matter where I am.

#### How do you think your success from using MasteringChemistry will affect your college experience/future career?

MasteringChemistry is instrumental in helping me succeed. My program requires an A or B in Chemistry I and II to earn my degree. Mastering has already helped me get an A in Chemistry I, and the future is looking in bright for Chemistry II.
