

## STUDENTS SPEAK: A MyLab Success Story

MyMathLab<sup>®</sup> MyStatLab<sup>™</sup> MyAccountingLab<sup>®</sup> MyFinanceLab<sup>™</sup>

### Emmadequann Varner

Strayer University, Douglasville, GA

**Ambition/Career Goal:** Bachelor's degree in Business Administration

**In my free time...** I enjoy fitness, sports, reading, and spending time with my son.

**What (or who) motivates and inspires you to graduate from college?**

My son inspires me. I want to lead by example and show him that no matter how successful you are, an education is priceless!

### How did using MyLab help you succeed in your courses?

Let's face it—math is not everybody's cup of tea, so to speak. MyMathLab, MyStatLab, and MyAccountingLab all helped me through the hardest classes I had to take in my college career! MyStatLab was the best thing for me, as statistics was the last required math class that I had to complete, and I was so lost. The step-by-step process of the "Help Me Solve This" feature showed me how to solve problems—it saved me and I passed the class! Each MyLab helped me pass all of my classes with Bs!

### What is the number one benefit of using MyLab?

MyLab helps you so that you can learn step by step. It supplements class instruction and is detailed in its teaching so that you can grasp each concept one piece at a time. My favorite features in MyMathLab were "Help Me Solve This" and "View an Example." I appreciated the option to go back and complete problems again. The MyLab shows you what mistakes you made so that when you get a similar problem, you can get that one correct.

### How do you think your success from using MyLab will affect your college experience/future career?

I definitely feel that the knowledge that I gained from using each MyLab will help me in my management career and help me with small duties such as payroll, accounting, time keeping, and other office procedures that require math! Prior to returning to college, I had been out of school for 13 years, so the math was all new to me. MyLab helped me to not only refresh my memory, but gain more knowledge that will stay with me for years.
