MathXL for School Release Overview

This December, it's all about **convenience.**

You're busy. With that in mind, we've added a couple time-saving and security features to MathXL for School. From student and assignment tagging to enhancing your ability to add questions to your assignments from other Pearson titles, these new course management features will help teachers like you make the most of MathXL for School as you're planning for next semester.

What's Inside?

- 4. Student and Assignment Tagging
- 7. Enhanced Book Search

Easier student and assignment management with tagging

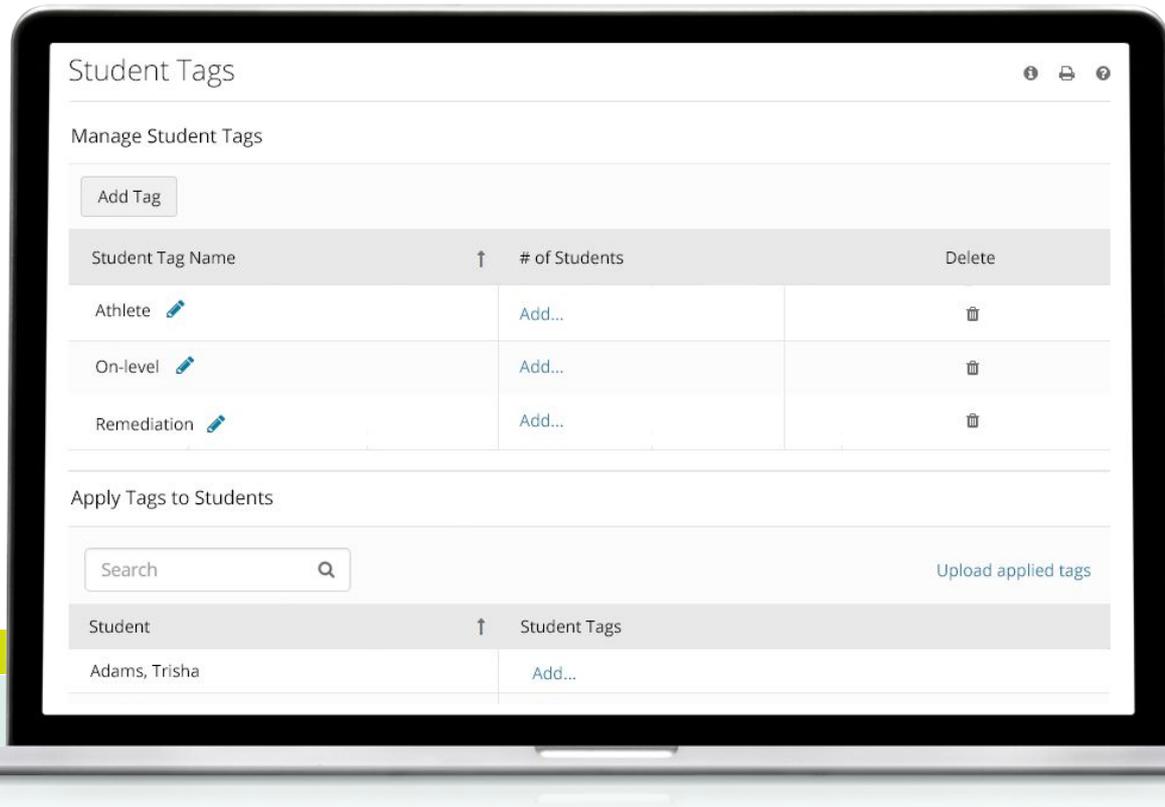

Have you ever needed a way to communicate regularly to a group of students? How about filtering to specific assignments in your gradebook? Or assigning assignments to certain groups of students but not others? Now you're able to do so with **student and assignment tags**, making it easier to manage your diverse classroom of students.

Student Tagging

Student Tags: Student tagging allows you to create distinct student categories. Once grouped, you may assign specific assignments, communicate with, and manage gradebook data for each student group.

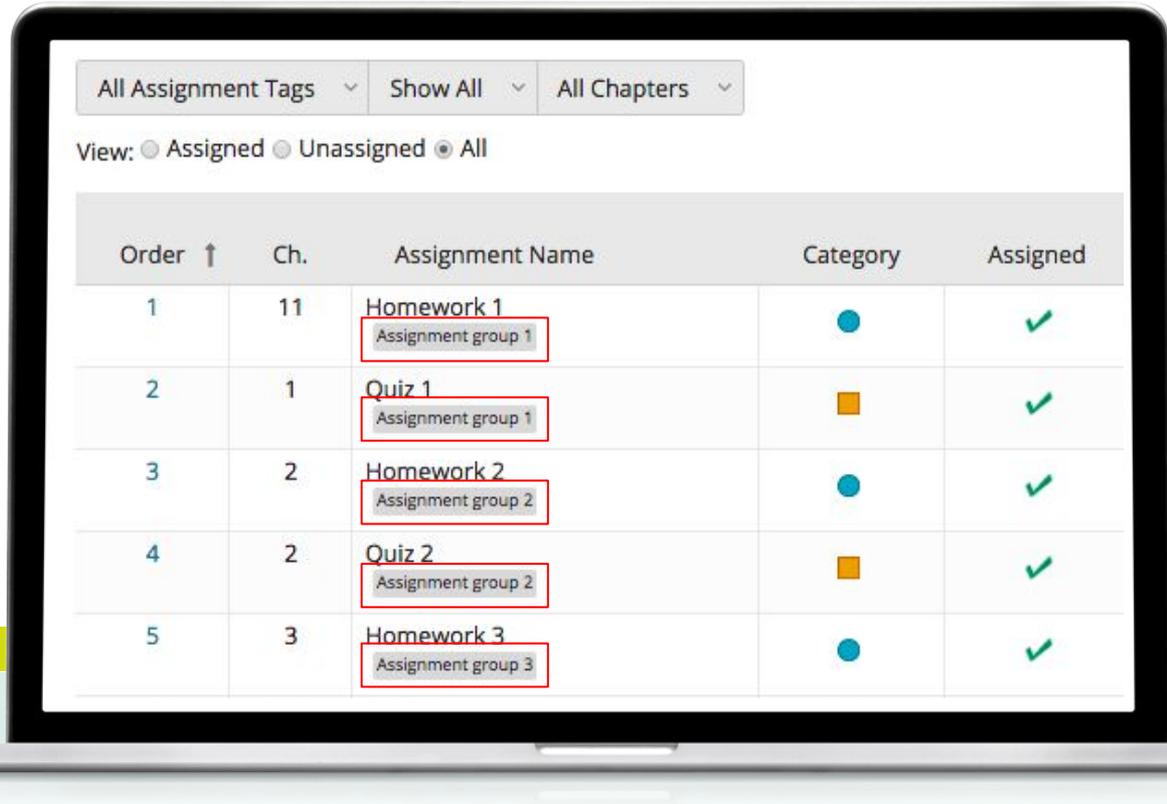

Student Tagging will provide an additional level of flexibility in managing courses with mixed groups of students.

Assignment Tagging

Assignment Tags: Assignment tagging allows you to create distinct assignment groups. You may filter by the assignment tag to simplify gradebook and assignment management.

Assignment Tagging will provide an additional level of flexibility in managing and assigning assignments to specific groups of students.

Order ↑	Ch.	Assignment Name	Category	Assigned
1	11	Homework 1 Assignment group 1	●	✓
2	1	Quiz 1 Assignment group 1	■	✓
3	2	Homework 2 Assignment group 2	●	✓
4	2	Quiz 2 Assignment group 2	■	✓
5	3	Homework 3 Assignment group 3	●	✓

Enhanced Book Search

Before, if you wanted to **add a question** to an assignment from another book, you needed to search by book title. Now you're able to search by learning objective across all titles making adding questions to assignments from other books quick and easy.

Enhanced Question Search

Enhanced question search allows you to search for additional questions by learning objectives across all available titles.

The screenshot displays the Enhanced Question Search interface on a laptop. The main search area includes a dropdown for 'Search By: Objective' and a text input field containing 'Fraction Notation'. A 'Search' button is located to the right of the input field. Below the search area, a list of books matching the search is shown, with 'Blitzer: Developmental Mathematics, 9e' highlighted. A 'Matched Objectives' pop-up window is open, displaying the following information:

- Chapter 2: Fraction Notation**
- Section: 2.1: Fraction Notation and Simplifying**
Objective: Simplify fraction notation
- Section: 2.5: Applications and Problem Solving**
Objective: Solve applied problems involving operations using fraction notation and mixed numerals.
- Objective: Estimate with fraction notation and mixed numerals.**

The interface also shows a sidebar with navigation options like 'Chapter 3 Review', 'All Sections', and 'All Objectives'. At the bottom of the screen, there are buttons for 'Cancel', 'Return to Course Book', and 'Select Book'.
