

## STUDENTS SPEAK: A MyLab Success Story

### MyMathLab®

#### Adilene Zacatenco

Cerritos College, Norwalk, CA

**Ambition/Career Goal:** To get my associate of arts degree and transfer to Cal State and get my bachelor's degree in criminal justice.

**In my free time...** I like to spend time with my baby and family as much as I can.

**What (or who) motivates and inspires you to graduate from college?** My baby motivates me because I want him to learn great things from me, be proud of my success and achievements, and know that anything is possible. I had him at an early age.

#### How did using MyMathLab help you succeed in your course?

I needed to take my Math 20 class in order to start taking a transferable Math 40 class. MyMathLab helped me learn everything step by step. I ended up passing my class with the highest grade and was able to skip to Math 60. I liked being able to view the videos that explained everything. I liked how MyMathLab would show me examples and let me following along step by step. Last, I liked how it helped me until I got the problem correct.

#### What is the number one benefit of using MyMathLab?

MyMathLab gave me the ability to learn basic math. Now I will have that knowledge with me and be ready for my next math class.

#### How do you think your success from using MyMathLab will affect your college experience/future career?

MyMathLab helped me advance more quickly than expected, and it helped me learn things that would have been hard for me to learn on my own. Now I can recall more math when I have my new math class next semester.
