Setting
St. Petersburg College is the fifth largest state college in Florida, serving 35,000 students each year. In the recent past, approximately 40 percent of students would place into developmental English and/or reading courses. However, a Florida law passed in 2013 requires many fewer students to take the placement test.

Challenges and Goals
With so many students in need of developmental education, we were eager to improve students’ results and learning experience. Specifically, we felt we needed to find ways to address the following concerns:

• dissatisfaction with pass rates in developmental courses;
• need to improve retention of developmental students;
• need to accelerate students’ advancement into college level courses;
• desire to improve students’ preparation for success in Composition I.

In 2010, the state of Florida made funding available for course redesign through a developmental education initiative grant. St. Petersburg College launched the first redesigned developmental reading and writing courses in spring 2011 on five campuses with 189 students. These redesigned courses transitioned from 16-week, 4-credit hour courses with 22 students per section in online, hybrid, and traditional formats to accelerated 8-week, 2-credit hour courses meeting in computer labs twice a week with no more than 15 students per section. For the 2013-14 academic year, enrollment held strong at 240 students in upper-level developmental writing and grew to 407 students in upper-level developmental reading. We have continued to offer the traditional 16-week courses.

We based the redesign of our courses on NCAT (National Center for Academic Transformation) principles, which allowed our new courses to include:

• diagnostic standards for placement into specific instructional modules;
• individualized pedagogy grounded in best practices;
• the opportunity to exit developmental coursework into college-level courses in the same semester;
• personalized, accelerated learning instruction to assess and address students’ individual weaknesses.

Implementation
We adopted MyWritingLab and MyReadingLab for these new developmental courses and had students complete the MyLabs’ diagnostic Path Builders, which we then correlated to Florida’s standard core competencies. The Path Builders prescribe an individualized Learning Path for students so they focus their work on areas assessed as “deficient,” allowing each student to generate a personalized instructional and assessment plan with multiple attempts for post-test mastery (which we define as 80 percent or better). Faculty lectures are supported through our learning management system. All sections have close ties to our Learning Support Commons.

Benefits
The advantages of MyLab implementation include: diagnostic assessment, consistency of course design, training support for adjunct faculty, and reduced costs for students through access codes.

These features in the redesigned courses enable some students to exit early if they satisfactorily demonstrate they have remedi-
“The redesigned courses with MyReadingLab and MyWritingLab are addressing students’ remediation needs quickly and effectively, enabling more students to advance out of developmental studies and into credit-level courses.”

Assessments
Redesigned reading course:
- 40 percent MyReadingLab assignments (at 80% mastery)
- 20 percent In-class assignments/quizzes
- 20 percent Midterm exam
- 20 percent Final exam

Redesigned writing course:
- 40 percent MyWritingLab tests and essays (at 80% mastery)
- 20 percent Midterm grammar exam
- 20 percent Research portfolio/persuasive essay
- 20 percent Final persuasive essay

Results and Data
- Success rates in the redesigned writing course have risen 9 percentage points over the last three years and are now at a high of 78 percent (Figure 1).
- Success rates in the redesigned reading course have risen 11 percentage points in the last three years and are now at a high of 84 percent (Figure 2).
- In 2013-14, the redesigned writing course and reading course have success rates 11 percentage points higher than the standard developmental writing and reading courses (Figures 1 and 2).

Conclusion
Course redesign offers many new academic pathways for students, and our redesign process will be ongoing. We want to advise students better throughout the process, provide completely online delivery of our redesigned courses, and further support the professional development of our faculty as they gain expertise with the redesign model. Nevertheless, in examining the student performance results of the old and new courses side-by-side, we see clearly that we are meeting our goals. The redesigned courses with MyReadingLab and MyWritingLab are addressing students’ remediation needs quickly and effectively, enabling more students to advance out of developmental studies and into credit-level courses swiftly, cost-effectively, and with a level mastery that fosters their success in subsequent courses.
